FPi 1000
Powerful, accurate, versatile.

FOLDING AND INSERTING

Increase your productivity with the FPi 1000

The tabletop inserting system **FPi 1000** accurately folds, inserts and seals up to 900 mail pieces per hour. The mailing of invoices, statements, letters and advertising is crucial for your company's success. Manual folding and inserting, however, is an unnecessary waste of time and resources. With the **FPi 1000**, you achieve perfect, accurate and reliable results. The **FPi 1000** is a compact system that is designed to reduce your workload so that you can make use of your time more efficiently. This allows you to focus on your important work. Thanks to the automation of your mailing processes, you can fully concentrate on your business and thus create added value for your customers.

Insert feeder
More relevant mail pieces with pre-folded brochures or information in the envelope format.

Convenience feeder
Give your everyday mailings a professional look, by adding up to 3 stapled or unstapled sheets.

Envelope feeder
The capacity of 60 envelopes makes it possible to insert materials during active operation and therefore ensure continuous operations.

Control panel
The simple user interface makes it easy to select jobs. Press the button on the control panel and then go back to your other tasks.

Sheet feeder
You can insert up to 80 sheets. One sheet feeder is included in the scope of delivery. A second sheet feeder can be purchased as an option.

Many useful functions
- Inserting/folding settings
- Adjustable for folding/inserting modes or pure folding modes
- Double sheet detection
- Resettable mail piece counter
- Selectable seal/no-seal modes
- Fold-only function
- 2 sheets can be fed from one tray consecutively
- The machine does not need a table edge

► **Productivity**
Automated folding and inserting saves time.

► **Accuracy**
Avoid expensive delays in the mailing process caused by manual errors.

► **Immediate operation**
Plug it in, insert the materials, and the system is ready for operation.

► **Flexible processing**
Invoices, statements, letters, advertising and other mailings are folded, inserted, reliably sealed in envelopes and then made ready for dispatch.

► **Versatility**
Automatically fold up to two DIN A4 sheets and insert them in a C6/5 envelope.

► **Increase your sales figures**
Add advertising inserts or reply envelopes to your mailing to promote the growth of your company.

► **Save time and reduce manual labour**
Our system processes 15 mail pieces per minute and is therefore six times faster than the manual process.
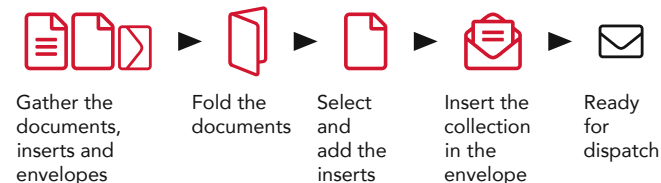

► **Accelerate your cash flow**
Invoices are sent more rapidly and are therefore paid more rapidly.
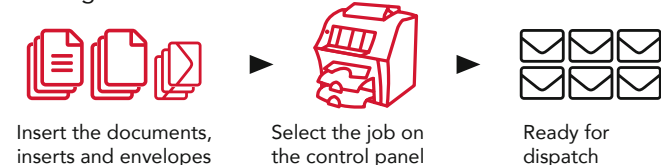

► **User friendliness**
All of the controls are directly available with clearly visible commands on the control panel.

Process six mail pieces in the same time that you would need to finish only one manually

Traditional manual mailing

Gather the documents, inserts and envelopes → Fold the documents → Select and add the inserts → Insert the collection in the envelope → Ready for dispatch

Mailing with **FPi 1000**

Insert the documents, inserts and envelopes → Select the job on the control panel → Ready for dispatch

User friendliness
Reduced complexity for users of all experience levels.

Accuracy
Avoid expensive delays caused by manual errors.

Productivity
Reliable speed and performance without downtimes ensure smooth mailing processes.

The mailing of invoices, statements and communications to your customers is important for your company.

However, complicated preparation of mailings costs time and can lead to errors that result in delays and dissatisfied customers. Thanks to the **FPi 1000**, it is very simple to produce mail pieces, so that the right documents always reach the right customer straight away.

Simple, trusted methods.

The **FPi 1000** was developed to meet the requirements of your whole team, regardless of their individual levels of experience. It can be used with minimal effort even by users without previous technical knowledge. The intuitive control panel makes it easy to set up and select job settings. The convincing user experience is based on a trusted platform and gives you the certainty that your mailings are produced rapidly and without interruptions.

One system – many possibilities

- Regular correspondence with customers
- Addition of sales-boosting inserts
- Increased safety for your mailings with envelopes that stay sealed
- Align mailing addresses for precise positioning in the envelope window, to ensure that your mail reaches its destination
- Send promotional materials on a regular basis
